

# CORN

## *fun facts:*

An average ear of corn has 800 kernels in 16 rows.

Corn always have an even number of rows on each cob.

There are over 3,500 different uses of corn products.

The long threads on top of a ear of corn are called silks. There is one silk strand for each kernel of corn.

One acre of corn removes about 8 tons of carbon dioxide from the air during the growing season.
