

FLOWER

fun facts:

Flowers are more important than just their beauty. They attract pollinators such as bees, butterflies, bats and hummingbirds.

Without flowers we would not have food, medicines, dyes and textiles.

Plants take in carbon dioxide and in turn produce and release oxygen.

In the 1600s, tulips in Holland were more valuable than gold.

Dandelions may seem like weeds...but they are an excellent source of vitamin A and C, iron, calcium and potassium.

Broccoli is actually a flower. The floweret actually bloom yellow flowers.
