

Forestry

fun facts:

There are over 100 different hardwood tree species growing in Ohio.

31% of Ohio is forested. That's 8.1 million acres in Ohio that are in tree cover.

Knots are the result of branches and can add great character to a piece of furniture.

When a piece is sawn, the knot can be "red" resulting from a live branch or "black" resulting from a dead branch.

118,000 Ohioans work in the hardwood industry with a total payroll of \$5.69 billion.
